

## **CWS 2009—China Water Show will be opening soon.....**

**CWS 2009**-The 10<sup>th</sup> China Water Show for Water Supply, Drainage and Water Treatment (Concurrent:The 10<sup>th</sup> China EPTEE Show for Water, Air, Waste, Energy and Recycling), which have a long standing reputation in China, will be held at Intex Shanghai and Shanghai Mart on 28-30, April 2009! Through 10 years development, CWS has already become the most influential exhibition in the water industry in China. More and more industry leaders regarded CWS as an excellent trading platform and the compulsory exhibition. It attracts thousands of visitors and buyers from all over the world with its plenty exhibits and high-class conferences and seminars.

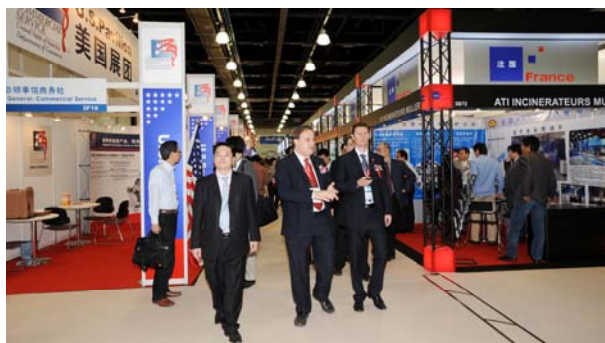

In 2009, there are challenges combined with opportunities in water industry. On one hand, the competition will be crueler in the background of the global financial storm; on the other hand, there are great potential and opportunities in Chinese water industry market. Therefore,CWS 2009 is a best platform for industry companies to show and expand sales market.

## **Global top brands gathering together, 800 exhibitors shining in Shanghai**

With 10 years successful experience, the CWS attracts many world famous companies to participate in. Until the end of February, industry leaders from Grundfos, PENTAIR, 3M, Watts , Hydranautics, Woongjin, GE, Siemens, Eco water, Memstar, HACH, SEKISUI, Arkal、BOLL、GOBETTER、Aqualyng、CWT、Henry Pratt、EBRO、Valmont、REHAU、CWT、Trojan、Dayu HOLY、 、Verder、Argal、Zenit、Espa、East Pump、Liancheng Group、Super Giant、Top Motor、Chanitex、Canature、Erkuan、GSD、Jingjin Filter、Universtar、 will participate in CWS 2009 with their top products and solutions.

## **Country and Region Pavilion showing the world top technology**

There are plenty of overseas country pavilions in CWS 2009. Until, the end of January, Germany Bavarian International Pavilion, Canada Ontario Pavilion, Czech Republic Ministry of International Trade and Investment Pavilion, U.S.A Pavilion, Water Environment Federation Pavilion, Israel

Pavilion, Korea Environmental Preservation Association Pavilion, Korea &China Eco-Industrial Technology Association Pavilion, Japan Pavilion and China Taiwan Pavilion has already confirmed their participation in CWS 2009. Among them, Taiwan Pavilion Organizer, Taiwan External Trade Development Council not only brings a exhibitors pavilion, they also organize a visiting group, which fully stands their curious and confidence about Mainland

China Market.

## Marvelous exhibits

The CWS 2009 will focus on the technology and products on sewage treatment, terminal pure water, membrane and membrane separation, instruments and meters detection, pump valve and fittings, atmosphere pollution, solid waste and resource usage. The CWS 2009 will show the environmental protection technology, products, solutions and application case, which will combined the seminars, conferences and exhibition.

### Membrane Technology: leading companies gathering

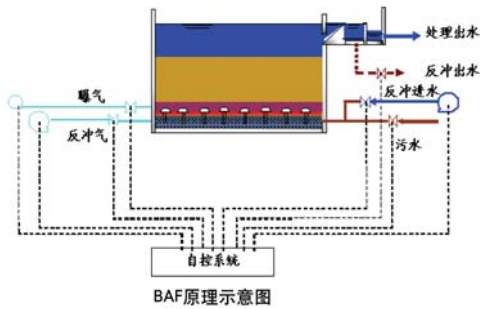

With such background of the rapid development of economy and global water quality deterioration, sewage treatment technology is highly needed to solve the pure water shortage situation, which has already become a bottleneck to restrict the society development. Therefore, new or improved efficient sewage treatment technology emerged in the recent years. Among them, membrane technology become more and more popular because of its efficiency, energy-saving, simple-equipment and easy operation in the fields of city sewage treatment, industry sewage treatment, drinking water treatment, seawater desalination and salt water desalinization. Hydranautics、Woongjin、Memstar、GE、Aqualyng、Pentair、Gobetter will presents their top and latest membrane products to the visitors.

### Terminal purified water: meet the needs for high living quality

With the rapid development of the society and the raising quality of people's living standard, more and more water pollution sources occurs, which makes worse water quality and less drinking water source. Because of the high need from people for drinking water, making water quality better is the most important issue in the 21 century. This situation makes the great need for the terminal pure water market. The CWS 2009 gathered many famous water purifying companies, such as Pentair、3M、Ecowater、Canature、Chanitex、USELIN、X-green、QIDI、Qianshan and so on, which bring their latest water purifying technology and products.

### Sewage Treatment: provide new sewage treatment solutions

In Such background of China's acceleration of urbanization and industrialization, the water resources are high needed. Therefore, sewage treatment becomes a new hit industry. Government is paying more and more attention to the environmental protection industry, and Chinese sewage treatment industry develops rapidly, but Chinese sewage treatment industry is still in

the early stage in the development. Lately, the government is making effort on the new carbon emission reduction standard on petroleum, chemical engineering, pulping, steel, electricity, spinning, printing and dyeing, which will bring more opportunities and space for the sewage treatment equipment manufacturer. REHAU、Jingjin、GRUNDFOS、Siemens、BIOREM、 will participate in CWS 2009 with their top sewage treatment equipment, which could meet the purchase need for the buyers.

### Waste Treatment and Recycling

Energy-saving and environmental protection becomes the development topic for many counties, which makes development opportunity for waste treatment and recycling. The garbage increment speed is 8.42% worldwide and more than 10% in China. Under such pressure, waste treatment and recycling industry will be very popular in the future. sinkotekuno、ShunHing、Harris、Tires、LIAONING has already confirmed their participation, which helps them .getting more portion in the Chinese Market.

### Pump, Valve and Pipe: Top brands gathered

Because of the great national investment situation and enlarge the investment for the infrastructure, pump and valve are welcoming their excellent development opportunities. Pump, Valve and Pipe are widely used in petroleum, chemical engineering, steel, electricity, environmental protection, water treatment, medicine, automobile, ship and machine and other industries. Grandfos、Pentair、SEKISUI、Watts、Henry Pratt、EBRO、Verder、Argal、Zenit、Espa、East Pump、Liancheng、Super Giant、Top Motor、GSD、Leo will bring us plenty of pumps, valves and pipes to meet the purchase need.

### High-class conferences and seminars

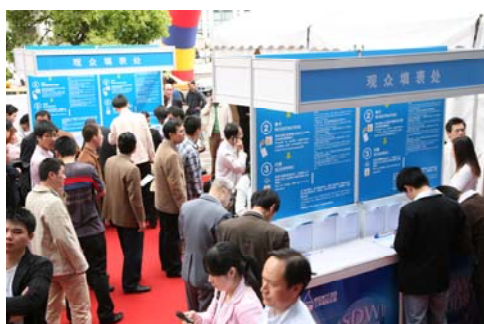

The following speech will be held during the show. Please make a reservation if you are

interested in, so that we can leave the seats for you.

- 1 Preparation and Characterization of PVDF hollow fiber membrane using thermal induced phase separation
- 2 Preparation and Characterization of PVDF hollow fiber membrane using thermal induced phase separation
- 3 Fouling RO Technology & Application
- 4 Technology and application of Recuperator and Fast Water for the Seawater Desalination
- 5 water industry: market trends in an era of recession and stimulus spending
- 6 Environmental Law and Environmental Forensics : a two ways process
- 7 California's Green Chemistry Initiative
- 8 Wastewater-Recycling Systems: Eliminate Sludge and Produce Potable Effluent
- 9 Energy conservation and emission reduction technologies research of municipal wastewater treatment plant
- 10 The algae, cyanobacteria toxin in drinking water and the odor control technology research
- 11 Emergency treatment technology of water pollution incidents
- 12 Water supply pipe network burst pipes and leakage controlled management
- 13 High concentrations of refractory industrial wastewater treatment technology
- 14 Water quality monitoring and water treatment technologies
- 15 Korea-China Int'l Environmental Technology Seminar

### Humanization Service

In order to improve the visitors' quality, reduce the waiting time on spot, build a better negotiation atmosphere, and embody the humanization service, all the spotted visitors will be charged 20RMB for one ticket. Visitors could get a free visiting voucher by registration on [www.c-watershow.com](http://www.c-watershow.com) before 25<sup>th</sup>, April, 2008. The visitors with free voucher could visit CWS any day during professional visitors' day (28<sup>th</sup> –30<sup>th</sup>, April )
